**CALL
FOR
PAPERS**

emBO++ Conference on modern embedded
system design

The embedded domain has been a growing industry for years. At emBO++ we want to discuss modern methods and unique techniques for building the embedded future.

EFFICIENCY - CODING STYLE - SAFETY

If you are working on embedded systems and want to share your expertise in

- library design for embedded architectures
- optimizing code for embedded platforms
- enhancing tool-chains for embedded targets
- designing PCBs for embedded systems

or anything else, embedded related, you are invited to apply for one of our lectures at emBO++2019.

YOU CAN APPLY FOR

- Giving a 3,5 hour workshop (with hands-on in best case)
- Giving a 15-Minute lightning-talk on Friday or Saturday
- Giving a 10-Minute lightning-talk on Thursday
- Giving a 50-Minute talk on Friday or Saturday
- Presenting a Poster at emBO++s exhibition hall

Please send your application to info@embo.io.

Tell us about what kind of lecture would suit you most (you may apply for one or all of the above), what you want to talk about and what you expect to be the attendees levels of expertise. What should they already know about to get the most out of your talk? Any embedded topic is welcome.

End of call is the 31st Dec 2018.

In the first week of Jan 2019 the emBO++ Jury will decide, which talks will be accepted.

Speakers benefit from a free ticket and exclusive access to other experts on embedded systems, as well as a great dinner with all the other lecturers on emBO-Fridays evening.
